PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student (CGPA: 9.03) with demonstrated experience in full-stack web development, AI/ML model building, and cloud-native application design. Proven track record of delivering award-winning projects across AI, IoT, and health-tech domains. Adept at Python, JavaScript, REST APIs, and agile development workflows. IEEE WIE Chairperson and NASA Space Apps mentor with strong leadership, communication, and problem-solving skills. Seeking a challenging software engineering or AI/ML role where I can contribute immediately and grow rapidly.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), C, C++, Java

AI / ML & Data Science: Scikit-learn, Pandas, NumPy, feature engineering, data preprocessing, classification, regression, model evaluation (accuracy, F1, confusion matrix)

LLMs & NLP: Transformer architecture, prompt engineering, LLM API integration, NLP fundamentals, text classification

Web Development: React.js, Node.js, Express.js, Tailwind CSS, HTML5, CSS3, RESTful API design

Databases: MongoDB, MySQL, Supabase, CRUD operations, schema design

Cloud & DevOps: Git, GitHub, Postman, Figma, basic cloud deployment (Vercel / Render)

Core CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks.

Soft Skills: Leadership, cross-functional teamwork, analytical problem-solving, technical communication, project management

WORK EXPERIENCE

AI/ML Developer Intern • ApanaGhr | Remote, Chennai

Jul 2025 – Oct 2025

- Designed and implemented an end-to-end machine learning pipeline using Python, Pandas, and NumPy to preprocess 10,000+ user records for a PG and roommate booking recommendation engine.
- Engineered and evaluated multiple classification models (logistic regression, random forest, gradient boosting), achieving ~20% improvement in recommendation relevance over the prior rule-based system.
- Tracked and reported model performance metrics (accuracy, F1-score, precision, recall) to the product team, directly influencing the recommendation system roadmap and feature priorities.
- Collaborated with backend engineers to integrate ML model outputs via REST API endpoints, enabling real-time personalised booking suggestions for end users.

PROJECTS

AI-Powered Predictive Traffic Management • Lead Developer

Oct 2024

- Architected a full-stack real-time traffic prediction system integrating IoT sensor data streams with a machine learning classification model, reducing simulated traffic congestion by 35% in test scenarios.
- Built and deployed a React.js front-end, Express.js REST APIs (15+ endpoints), and MongoDB data store; led a 4-member team through design, development, and live demonstration.

- Won 1st prize at Sri Manakula Vinayagar Engineering College Innovators Day 2024, competing on a national level, and received recognition at Vel Tech University's SpaceHer contest.

E-Commerce Full-Stack Application • Full Stack Developer

Oct 2025

- Built a production-ready e-commerce platform with JWT-based authentication, full CRUD operations, and 15+ RESTful API endpoints using Express.js and MongoDB.
- Designed a reusable React.js component library (12 components) with Tailwind CSS responsive layouts; reduced UI build time by 30% through component reuse across 4 feature modules.
- Implemented cart management, order processing, product search with filters, and Express middleware for input validation and error handling.

Voice-Controlled Desktop Assistant • Developer

Sep – Oct 2023

- Built an offline voice-command desktop assistant using the Vosk ASR model, achieving 90%+ command recognition accuracy in standard noise environments.
- Integrated PyAutoGUI automation for 10+ command categories (app launch, file operations, web search), reducing repetitive task execution time by ~60%.

EDUCATION

B.Tech — Computer Science Engineering | CGPA: 9.03 / 10 • Vel Tech University | Chennai, India Aug 2023 – May 2027 (Expected)

- Relevant coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming.
- Active member: IEEE Women in Engineering (WIE) Student Affinity Group — currently serving as Chairperson.

Class XII (PCM) | 67.8% • Shree Gurukrupa Vidya Sankul | Surat, Gujarat

May 2021 – Jul 2022

- Completed NCC A Certificate with Grade A.

Class X | 73.8% • Shree Gurukrupa Vidya Sankul | Surat, Gujarat

Mar 2019 – May 2020

AWARDS, LEADERSHIP & EXTRACURRICULARS

- NASA International Space Apps Challenge 2025 — Galactic Local Mentor (Amritsar & Chandrapur hubs).
- IEEE WIE Chairperson, Vel Tech University (Dec 2025) — led 150+ member affinity group; organised workshops, technical talks, and outreach events for women in STEM.
- 1st Place — Group Discussion Contest, Vel Tech University (Feb 2026).
- 1st Prize — Innovators Day 2024, Sri Manakula Vinayagar Engineering College: Predictive Traffic Management .
- 3rd Prize — SpaceHer Project Idea Contest, Vel Tech University: Women's Safety via SpaceTech (Nov 2024).
- Hackathon Organizer — Sankalp 2.0 Virtual Hackathon on GatherTown (Jun 2025).
- Event Organizer — Tantraz 2K26, National Level Connexion Tech Event, Vel Tech University (Mar 2026).

CERTIFICATIONS

- Node.js Case Study: Movie App on Node.js and MongoDB — Infosys (Apr 2026).
- Data Structures & Algorithms in Python: Sorting Algorithms — Infosys(March 2025).
